

VIBINSTON J

Full Stack Developer

+91 7092208316 | vibinston506@gmail.com | [linkedin.com/in/vibinston-j](https://www.linkedin.com/in/vibinston-j) | github.com/vibinston-fdo

SUMMARY

Full Stack Developer skilled in Python, FastAPI, React, and MySQL, with hands-on internship experience across HTML/CSS, Bootstrap, Django, and JavaScript. Built SysWatch AI, a real-time system monitoring platform using REST APIs, JWT authentication, and Scikit-learn-based machine learning for automated anomaly detection. Comfortable working across the stack — from database design to responsive UI — with a strong focus on writing clean, practical, industry-relevant code.

TECHNICAL SKILLS

- Languages: Python (Intermediate), HTML, CSS, JavaScript, SQL
- Frameworks & Libraries: React, FastAPI, Django, Bootstrap, Ionic Framework
- Backend Concepts: REST API design, JWT Authentication, Machine Learning (Scikit-learn)
- Database: MySQL
- Tools: Git, GitHub, Linux (basic system commands), Postman

EDUCATION

B.Sc. Computer Science (3rd Year — Pursuing)

Madras Christian College, Chennai

PROJECTS

SysWatch AI — Real-Time System Monitor with AI Anomaly Detection

Tech: FastAPI, React, MySQL, Scikit-learn, JWT, REST API, Docker

- Built a fullstack web app using FastAPI, React and MySQL to monitor 5 microservices in real time
- Used Scikit-learn's Isolation Forest to detect CPU spikes, memory leaks and latency anomalies automatically
- Implemented JWT login, REST APIs and a live dashboard with charts, alerts and AI-generated fix suggestions

Interactive Quiz Application — EVS Day Exhibition

Tech: Python, Streamlit, JSON

- Built a quiz app using Python and Streamlit with real-time score tracking
- Implemented a JSON-based leaderboard and session handling
- Deployed online for public access during the EVS Day exhibition

EXPERIENCE

Python Fullstack Web Development Intern

Postulate Info Tech | May 2026 – Jun 2026

- Trained in HTML, CSS, Bootstrap, Ionic, Python, Django and JavaScript through hands-on tasks and assignments
- Built real-world projects applying fullstack concepts including database integration, form handling and REST APIs
- Attended personality development and professional communication sessions

CERTIFICATIONS

- Career Essentials in Software Development — Microsoft & LinkedIn
- Programming in Python — Meta
- Tools of the Trade: Linux and SQL — Google
